# LOOKING FOR TECHNOLOGY CARDS?

WE HAVE THE SOLUTION!

We are proud to offer a wide range of RFID embedded technology products. Available as both blank and custom printed options, we can provide a solution that works with virtually any RFID system. We offer the most commonly used RFID technology and stay on top of the latest trends so we can accommodate your current and future needs.

WHAT IS RFID?

Radio Frequency Identification (RFID) is the wireless, no-contact use of radio frequency waves to transfer data. Our contactless RFID chips are embedded in the center of the plastic cards, barely visible to the naked eye. When properly encoded, they can be programmed to wirelessly open RFID-enabled devices. These are used as hotel key cards, security access cards, and much more.

RFID CARDS

Our compatible RFID cards are available in many different configurations, frequencies, and capacities. Pricing for our standard configuration is listed to the right. We also offer NFC / NTAG2XX and UHF cards.

PROXIMITY CARDS

Our proximity / access control cards are ISO compliant and compatible with most 125kHz systems. Cards are available in a large variety of bit formats with or without a magnetic stripe.

RFID WRISTBANDS

RFID wristbands are a new trend - particularly in the hospitality industry. Recipients love the convenience of carrying their hotel room key on their wrist which also offers a contactless solution to make purchases throughout the resort.

Pricing for the most commonly used RFID card specifications are listed to the right. Looking for something more unique? Request a custom quote.

MADE IN THE USA

- **RFID Embedded**
- **ISO/IEC 14443A**
- **Credit Card Size**

Our contactless RFID embedded plastic cards are available blank or with printing. Most popular uses include hotel key cards and a variety of security access passes. All compatible RFID cards are compliant with ISO/IEC 14443A. Pricing below is for our standard configuration which includes 13.56 MHz high frequency with 1k bytes. Inquire for pricing on encoding, additional frequencies/capacities, and configurations including magnetic stripe upgrades.
