

RFID & HOTEL KEY CARDS

- **RFID Embedded**
- **ISO/IEC 14443A**
- **Credit Card Size**

Our contactless RFID embedded plastic cards are available blank or with printing. Most popular uses include hotel key cards and a variety of security access passes. All compatible RFID cards are compliant with ISO/IEC 14443A. Standard configuration includes 13.56 MHz high frequency with 1k bytes. Inquire for pricing on encoding, additional frequencies/capacities, and configurations including magnetic stripe upgrades.

WHAT IS RFID?

Radio Frequency Identification (RFID) is the wireless, no-contact use of radio frequency waves to transfer data. Our contactless RFID chips are embedded in the center of the plastic cards, barely visible to the naked eye. When properly encoded, they can be programmed to wirelessly open RFID devices.
